

## Trantech CF8 / 304 Stainless Steel Valve

Trantech Radiator Products has transitioned from being a radiator supplier to a **Cooling Systems** company. Through the years, Trantech has provided new products to meet changing industry standards as well as value added components that meet the needs of our customers.

Our valve product offering continues to expand with the introduction of a CF8 / 304 Stainless Steel Valve. The valve is made to meet the most demanding conditions while remaining a cost effective approach to corrosion prevention. Our testing and product development offers a proven valve design that encompasses industry best materials for applications that require the use of stainless products.

### Stainless Valve Features:

- Assembled valve body and packing tested at 60 PSI submerged.
- Flapper seals tested at 20 PSI submerged.
- Easy to read position indicators.
- SS Mounting hardware and cover plate included with all valves.
- Option of painted ANSI 70 Grey.
- Tested to 5K lbs. load per valve.
- Easy to use lever action handle.

### Trantech Stainless Steel Valves are manufactured and assembled to meet the most demanding conditions:

1. ASTM A351 GR - CF8 Body (304 SS Casted Equivalent)
2. 304 SS Springs
3. 304 SS Cover Plates (Attached with 304 SS Hardware)
4. Nitrile Rubber O-Rings (Viton is available)
5. Internal Assembly Parts of 304 SS
6. 304 SS Washers
7. Nitrile Flapper Gaskets (Viton is available)
8. Flapper Assembly Parts of 304 SS
